

Group7:

Summary:

Use Regression with Tabular Metadata and Swin-Transformer with Image Data to determine the pet photo's "Pawpularity".

Strength: Clear structure; Nice visualization.

Quality of writing: 5; The report is clear written and well organized.

Presentation: 5; The presentation is clear and well organized. The slides are nice and easy to read.

Creativity: 4; Swin-Transformer is a nice model. But if there are more models to compare, then this experiment would be better.

Confidence: 3
