

Group3:

Summary: Using dataset from Kaggle and various machine learning algorithm to predict whether a client will default. The report includes 3 parts: 1. Dataset 2. Validation & feature selection 3. Result.

Strength: Good demonstration; well structure poster.

Weakness: Data visualization is not enough; data analysis is not adequate

Quality of writing: 5; Clearly writing; well organization.

Presentation: 4; the visualization is not enough; however, the PowerPoint is quite clear.

Creativity: 3; training algorithms are common; the steps just are following the standard procedure, there is no unique way or method to deal with the model or dataset.

Confidence: 3
