

Group6:

Summary: Predicting the survival on the Titanic. Compare the tree-based model and linear model.

Weakness: This project's idea is not fancy compared with the other students.

Quality of writing: 4; Clearly writing; Visualization of tree model.

Presentation: 2; The presentation was short and there was nothing new.

Creativity: 1; The ideas are excessively normal, and these models could be tested in the first project

Confidence: 2; Browse the paper without checking details since same work had been done in my first project.
