Group4:

Summary:

They were trying to predict some of the cryptocurrency price movements in advance and forecast short-term log returns in 14 popular cryptocurrencies. And they utilized light Gradient Boosting Machine (light GBM), LSTM (Long Short-term Memory), Multivariate Times Series Transformer, and Wavenet as the prediction models.

Strength: Clear structure; method for doing this research is innovative.

Quality of writing: 5; The report is clear written and well organized.

Presentation: 5; The presentation is clear and well organized. The slides are nice and easy to read.

Creativity: 5; The result is good. Wavenet model and Multivariate Time Series Transformer are some fancy to inspire me to related work.

Confidence: 3
